

5-mer polyGly

PRODUCT DESCRIPTION

5-mer polyGly is a 5-amino-acid synthetic peptide. A synthetic peptide used as a research tool in biochemistry, pharmacology, and biomedical research. This peptide enables the study of protein-protein interactions, receptor binding, enzyme substrate specificity, and signal transduction pathways. Available in high purity (>=95% by HPLC) as a lyophilized powder for reconstitution in appropriate buffers.

PRODUCT SPECIFICATIONS

|                   |                                      |
|-------------------|--------------------------------------|
| Catalog Number    | BPT0885                              |
| CAS Number        | 7093-67-6                            |
| Molecular Weight  | 303.2712 Da                          |
| Molecular Formula | C10H17N5O6                           |
| Purity            | Peak Area by HPLC >=95%              |
| Form              | Lyophilized                          |
| Source            | Synthetic (Chemical Synthesis, SPPS) |
| Endotoxin         | N/A (Synthetic peptide)              |

AMINO ACID SEQUENCE

One-Letter Code:

GGGGG

Three-Letter Code:

H-Gly-Gly-Gly-Gly-Gly-OH

RESEARCH APPLICATIONS

|                  |                           |
|------------------|---------------------------|
| Application      | Biological activity       |
| Biomarker Target | Peptide Target            |
| Research Area    | Biomedical Research       |
| Sub-category     | Research Peptides & Tools |

STORAGE & HANDLING

|                      |                                                       |
|----------------------|-------------------------------------------------------|
| Storage Temperature  | -20 deg C                                             |
| Form                 | Lyophilized                                           |
| Stability            | Lyophilized product stable for 24 months at -20 deg C |
| Reconstitution       | Reconstitute in sterile water or appropriate buffer   |
| After Reconstitution | Aliquot and store at -20 to -80 deg C                 |
| Avoid                | Repeated freeze-thaw cycles                           |

AVAILABLE SIZES

|              |             |
|--------------|-------------|
| Size Options | 1 mg, 10 mg |
|--------------|-------------|

## Usage

Research use

## QUALITY CONTROL

### Purity Method

HPLC, Mass Spectrometry (MS)

## Identity

Confirmed by ESI-MS or MALDI-TOF

## Purity

Peak Area by HPLC  $\geq 95\%$

## Documentation

Certificate of Analysis (CoA) available upon request
