

[D-Ala2] Dynorphin A (1-9), porcine

PRODUCT DESCRIPTION

[D-Ala2] Dynorphin A (1-9), porcine is a 9-amino-acid A peptide from the prodynorphin/opioid peptide family, functioning as an endogenous ligand for kappa-opioid receptors (KOR). Dynorphins play key roles in pain modulation, stress responses, reward circuits, and mood regulation. This peptide is used in neuroscience and pain research to study opioid receptor pharmacology, analgesic mechanisms, and addiction neurobiology.
